Rahul Menon

Azure Data Engineer | 5 Years of Experience

Bengaluru, India | +91 98765 43210 | rahul.menon@example.com | linkedin.com/in/rahulmenon-sample

PROFESSIONAL SUMMARY

Azure Data Engineer with 5 years of experience building cloud data pipelines, lakehouses and data warehouses. Strong in Azure Data Factory, Databricks, Synapse, Microsoft Fabric, PySpark and SQL. Has delivered ETL/ELT solutions that process terabytes of data every day, cut cost and improve data quality for finance, retail and supply chain teams.

TECHNICAL SKILLS

Cloud & Azure	Azure Data Factory, Azure Databricks, Synapse Analytics, Microsoft Fabric, ADLS Gen2, Azure SQL, Key Vault, Event Hubs, Azure Functions
Languages	SQL (T-SQL), Python, PySpark, Spark SQL, basic Scala
Data Engineering	ETL/ELT, medallion architecture, Delta Lake, incremental load, SCD Type 1/2, dimensional modeling, data quality checks
DevOps & Tools	Azure DevOps, Git, CI/CD pipelines, Terraform (basic), Power BI, Great Expectations
Streaming	Event Hubs, Spark Structured Streaming, Kafka (basic)

WORK EXPERIENCE

Senior Data Engineer — Nimbus Retail Technologies, Bengaluru

Jun 2024 – Present

- Designed a lakehouse on ADLS Gen2 and Databricks using the medallion (bronze/silver/gold) pattern for 40+ source systems.
- Built metadata-driven Azure Data Factory pipelines that reduced new source onboarding time from 2 weeks to 3 days.
- Tuned PySpark jobs (partitioning, broadcast joins, Z-ordering) and cut daily batch runtime by 45% and compute cost by 30%.
- Moved 12 legacy reports to Microsoft Fabric with Lakehouse and Warehouse, serving Power BI users with faster refresh.
- Set up data quality checks and alerts, which lowered failed data loads by 60%.
- Mentored 3 junior engineers and led code reviews and CI/CD release practices in Azure DevOps.

Data Engineer — Finserv Analytics Pvt Ltd, Chennai

Jul 2022 – May 2024

- Developed ETL pipelines in Azure Data Factory and Synapse to load daily transaction data (about 500 GB/day) into a data warehouse.
- Implemented SCD Type 2 and incremental loads using Delta Lake MERGE, improving load time by 50%.
- Created star-schema models for finance and risk reporting used by 150+ business users.
- Added real-time ingestion with Event Hubs and Spark Structured Streaming for fraud monitoring dashboards.
- Secured pipelines with Key Vault, managed identities and role-based access control.

Associate Data Engineer — Zenith Software Services, Kochi

Nov 2021 – Jun 2022

- Wrote complex T-SQL queries, stored procedures and SSIS packages for a retail data warehouse.
- Migrated on-premises SQL Server workloads to Azure SQL and Azure Data Factory with zero data loss.
- Automated manual reporting tasks with Python scripts, saving about 20 hours per week.

KEY PROJECTS

- **Enterprise Lakehouse Migration:** Moved a Hadoop-based platform to Azure Databricks and Delta Lake; improved query speed by 3x and cut storage cost by 25%.
- **Demand Forecasting Data Platform:** Built feature pipelines and gold tables for forecasting models at part and week level, with rolling refresh.

EDUCATION

B.Tech in Computer Science and Engineering — Cochin University of Science and Technology, 2021

CERTIFICATIONS

Microsoft Certified: Azure Data Engineer Associate (DP-203) • Fabric Analytics Engineer Associate (DP-600) • Databricks Certified Data Engineer Associate
